

7.5 ALLOY

ELECTROSOL OPTION ALSO AVAILABLE

SEALEGS®

BE AMPHIBIOUS

The 7.5m builds off the design, function and aesthetic of two of our most advanced releases: combining new-age styling, married with the Hydrasol technology found in the 7.5m and 9.0m Hydrasol RIB.

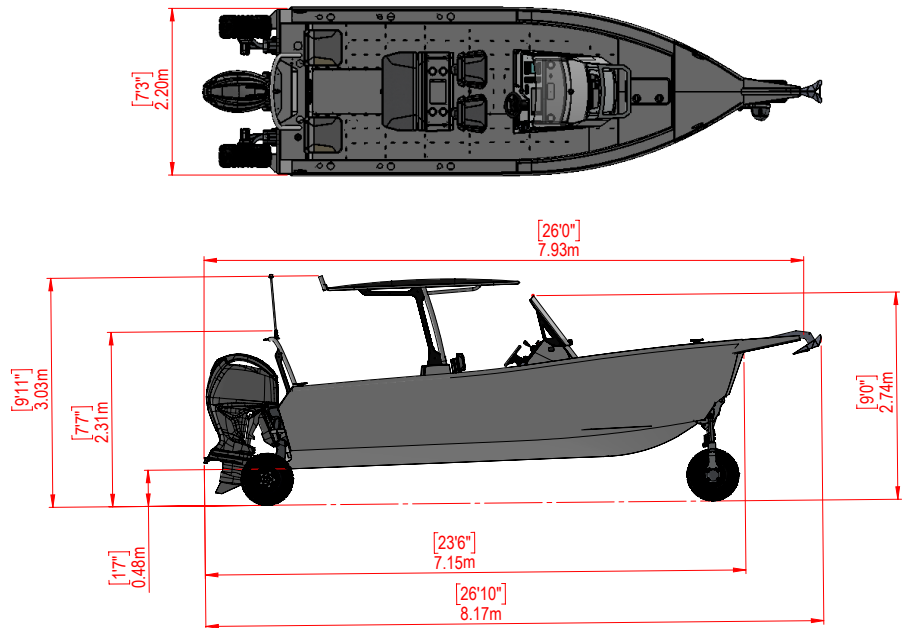

The 7.5m Alloy is highly configurable boasting a number of different seating, storage and usage options. With three standard layouts - Open, Social and All-round, the 7.5m Alloy represents one of the most customisable Sealegs to date.

Configurable with an optional T-Top for enhanced sun protection, Joltrider suspension seats as well as numerous internal fitout options, the 7.5m Alloy has something for everyone no matter what sort of boating you're into.

SEALEGS®
